

## Embedding assistant in the HTML SCRIPT:

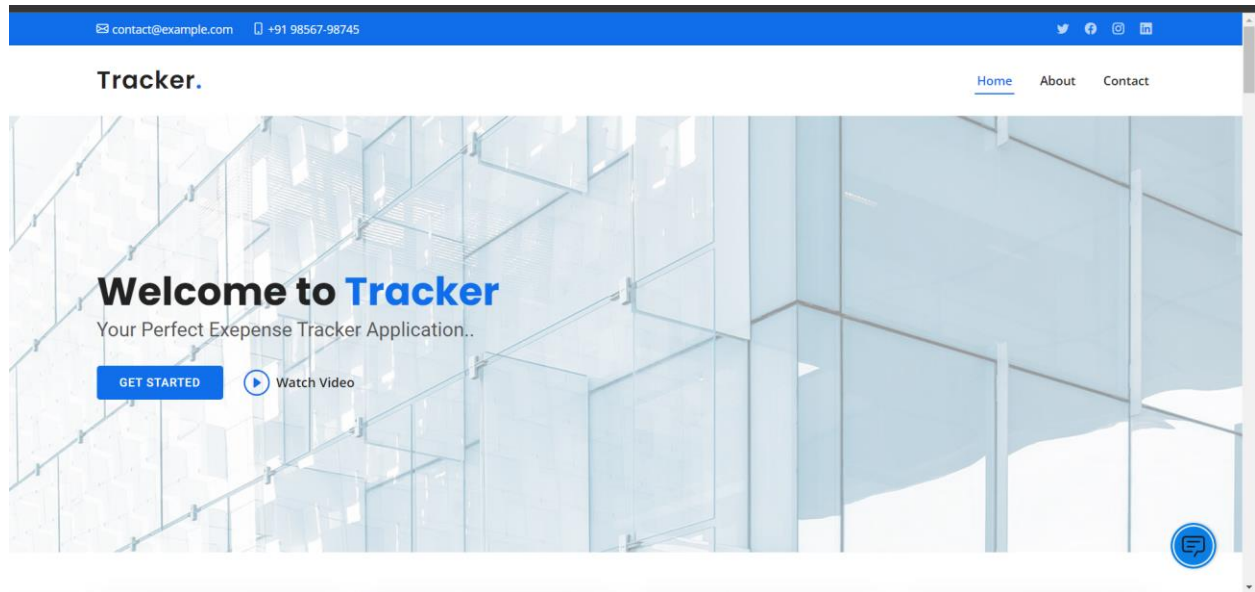

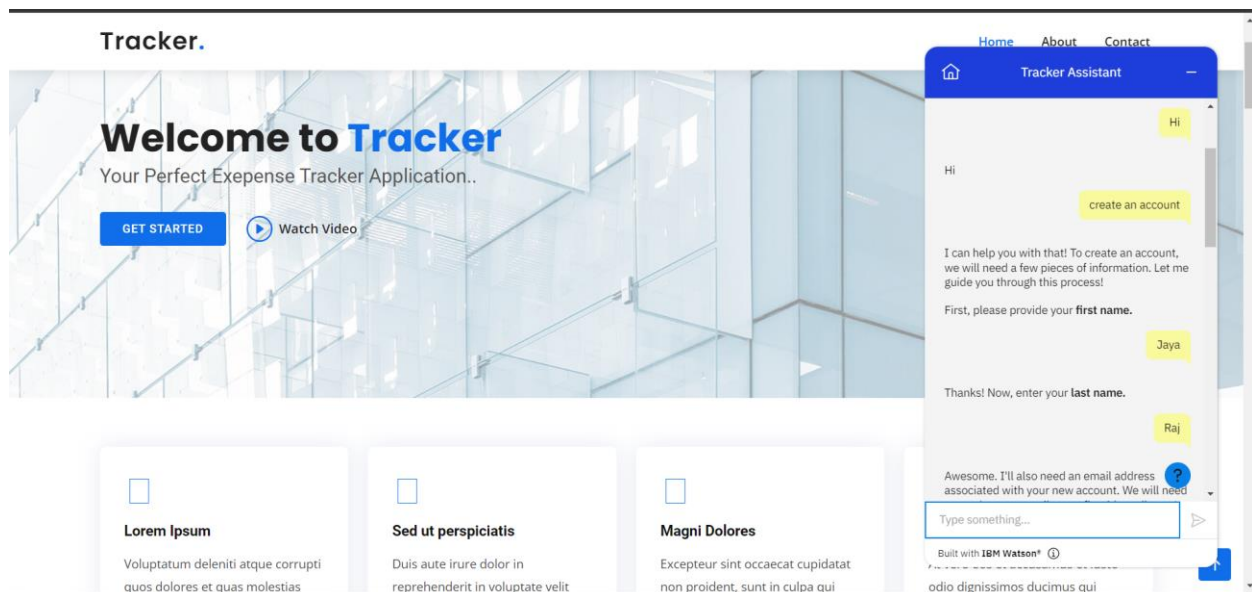

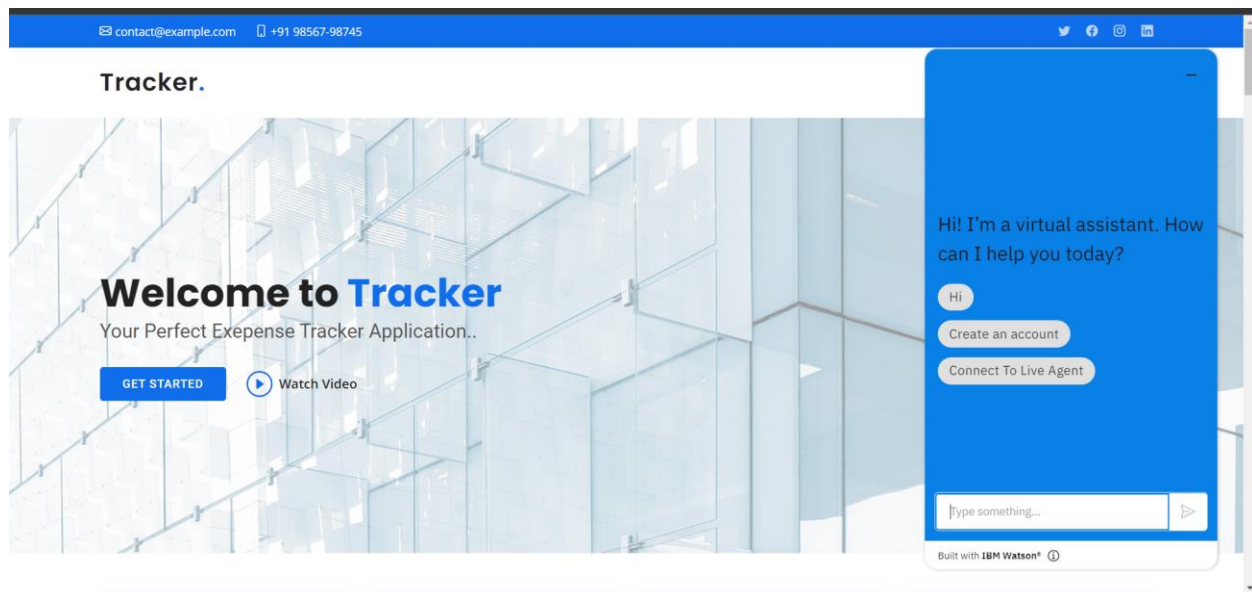

The screenshot shows the Visual Studio Code editor interface with the file `mainindex.html` open. The editor displays HTML code with line numbers from 638 to 669. The code includes several script tags for vendor files and a custom script for the Watson Assistant chat interface. The custom script is enclosed in a `<!-- Watson Assistant -->` comment block and contains the following JavaScript code:

```
638 <!-- Vendor JS Files -->
639 <script src="static/assets/vendor/purecounter/purecounter_vanilla.js"></script>
640 <script src="static/assets/vendor/aos/aos.js"></script>
641 <script src="static/assets/vendor/bootstrap/js/bootstrap.bundle.min.js"></script>
642 <script src="static/assets/vendor/glightbox/js/glightbox.min.js"></script>
643 <script src="static/assets/vendor/isotope-layout/isotope.pkgd.min.js"></script>

657         onLoad: function(instance) { instance.render(); }

659     setTimeout(function(){
